## Additional Public Disclosures 31 December 2017

Pillar 3 Disclosures - 31 December 2017

### 1 Introduction

These disclosures have been prepared in accordance with the Central Bank of Bahrain's (CBB) requirements outlined in the Public Disclosure Module ("PD Module"), Chapter 1.3 of the CBB Rule Book, Volume II for Islamic Banks. These disclosures follow the requirements of Basel III and the Islamic Financial Services Board's (IFSB) recommended disclosures for Islamic banks, and should be read in conjunction with the disclosures made in the Bank's reviewed interim condensed consolidated financial statements for the half year ended 31 December 2017.

These disclosures, also referred to as "Pillar 3" disclosures are designed to promote market discipline and transparency by providing information on a firm's risk exposures and risk management processes. The Bank makes these disclosures on a comprehensive basis comprising qualitative and quantitative information annually and on a restricted basis at the half year reporting stage.

The Bank has adopted the Standardised Approach for Credit Risk and Market Risk and follows the Basic Indicator Approach for Operational Risk to determine its capital requirements.

As at 31 December 2017, the Bank's total risk weighted assets amounted to US\$ 871 million; Common Equity, Tier 1 Capital and total regulatory capital amounted to US\$ 165.1 million, US\$ 165.1 million and US\$ 166.5 million respectively. Accordingly, Common Equity Ratio, Tier 1 Capital Adequacy Ratio and total Capital Adequacy Ratio was 18.96%, 18.96% and 19.11% respectively, which exceeds the minimum capital requirement of the CBB of 12.5%.

## 2 Capital Structure

## 2.1 Capital Base

The authorized share capital of the Bank is US\$ 500 million, comprising 500 million common shares of US\$ 1 each. The Bank's current paid up capital is US\$ 190 million held by 174 shareholders from countries in the Gulf Cooperation Council ("GCC").

## 2.2 Group structure:

Retained earnings / paid up capital

Subsidiary

The Bank has the following operational subsidiaries, together ("the Group") which are fully consolidated in its consolidated financial statements.

| tota   | al equity)                    | 68.4%            | 65.8%     | 56.0%            | 49.0%        | 14.4%        | 15%          | 11%               |

As shown by the consolidated financial statements, the main contributor to revenue in the curren tperiod was gain from sale of investment. The Bank's investment team are working on a pipeline of deals which are expected to grow fiduciary assets under management and thereby increase the proportion of recurring income from management fees.

## Pillar 3 Disclosures - 31 December 2017

## Capital Structure (continued)

## Capital Adequacy

- 2.4 The Bank's capital adequacy management program ensures that the Bank not only complies with regulatory capital requirements, but also continues to maintain a strong capital base to support its business.
- 2.5 The Bank utilises a risk adjusted measure of capital adequacy (i.e. Capital Adequacy Ratio or "CAR") based on the regulatory regime implemented by the CBB that is consistent with the Basel III guidelines issued by the Basel Committee on Banking Supervision's International Convergence of Capital Measurement and Capital Standards.
- 2.6 The CBB requires all Bahrain banking institutions to implement the Basel III guidelines for the maintenance of minimum level of capital calculated for three major components of risk exposures i.e. credit risk (including investment risks), operational risk and market risk, plus minimum leverage and liquidity coverage ratios.
- 2.7 The Bank uses the Standardised Approach to quantify its credit and market risk weighted exposures and the Basic Indicator Approach for operational risk.
  - a. Credit risk weighted exposures may be calculated in three different methods of varying degrees of sophistication, namely the Standardized Approach, Foundation Internal Rating Based Approach and Advanced Internal Rating Based Approach. The Bank has adopted the Standardized Approach for credit risk measurement, which uses fixed risk weights for different categories of credit risk.
  - b. Market risk weighted exposures may be quantified using the Standardized Approach, which uses fixed capital charges for specific categories of market risk, or the Internal Models Approach subject to prior approval by CBB. The Bank uses the Standardized Approach for market risk measurement.
  - c. For operational risk, there are three different approaches Basic Indicator Approach, Standardized Approach, and Advanced Measurement Approach. The Bank uses the Basic Indicator Approach, which uses the average of the gross income for the past three years as a basis for the calculation of capital charge for operational risk.
- 2.8 In determining CAR, the Bank calculates its risk adjusted assets, which are then expressed as a factor of regulatory eligible capital rather than the equity capital appearing in the Bank's statement of financial position. Regulatory capital is composed of three elements:
  - a. Common Equity Tier 1 Capital which is the nominal value of paid in capital, audited retained earnings and accumulated reserves arising from the appropriation of current and past years' income and/or retained earnings less treasury stock, minority interests and negative fair value reserves. Local regulations also require that certain investments or exposures should be deducted from Tier 1 capital.
  - b. Additional Tier 1 Capital, which consists of the qualifying portion of minority interests in consolidated entities given recognition.
  - c. Tier 2 Capital, which consists of the qualifying portion of subordinated loans (nil in VCB's case) and general loss provisions. Under the CBB regulations, the aggregate amount of Tier 2 capital eligible for inclusion in the CAR is limited to no more than 100% of Tier 1 Capital.
- 2.9 As the Bank has no operating branches outside the Kingdom of Bahrain, it is subject only to the capital requirements of the CBB, which currently requires all financial institutions in Bahrain to maintain a 12.5% minimum CAR.
- 2.10 The Bank's capital adequacy position is reviewed and stress tested regularly for various scenarios given the nature of the Bank's investments in alternative assets. Prudential Returns on the Bank's capital adequacy are filed quarterly with the CBB and reviewed by the external auditors.
- 2.11 During the period ended 31 December 2017, the Bank continued the development and enhancement of its risk management and internal capital adequacy assessment framework.
- As a further step in mitigating risks, the Bank follows a policy of diversification in is activities இஸ்ருவு பு 2.12 to minimize the risk exposure to particular geographical regions, counterparties, instruments and types of business.

## Pillar 3 Disclosures - 31 December 2017

## 3 Risk Management

## Risk Governance Structure

- 3.1 As an Islamic investment bank dealing predominantly in alternative assets, the Bank is exposed to various risks in the normal course of its business. These risks include:
  - a. Credit and counterparty credit risk
  - b. Market risk
  - c. Operational risk
  - d. Equity risk in the Banking Book (Investment Risk)
  - e. Liquidity risk
  - f. Profit margin rate risk in the Banking Book
  - g. Displaced Commercial Risk (DCR)
- 3.2 An understanding of and transparency in risk-taking are key elements in the Bank's business strategy. The Bank maintains a prudent and disciplined approach towards risk taking, and embeds a structured risk management process as an integral part of its decision making practice. This risk management process, which is applicable to the various risks the Bank is exposed to, is divided into three key components comprising the following:
  - a. Risk Identification and Measurement
    - i. Procedures for the identification and quantification of risks
    - ii. The use of quantitative models and qualitative approaches to assess and manage risks
  - b. Risk Control
- i. Clearly defined risk exposure limits
- ii. Criteria for risk acceptance based on risk and return as well as other factors
- iii. Portfolio diversification and, where possible, other risk mitigation techniques
- iv. Robust operating policies and procedures
- v. Appropriate Board Committee's authorization and approval for investment transactions
- c. Risk Monitoring and Reporting
  - Ongoing review of exposures and risks by Risk Management Department, including stress testing and frequent reporting to the Board
  - ii. Periodic internal audits of the Bank's control environment
- 3.3 The Bank's Board of Directors through its Risk Committee (a subcommittee of the Board of Directors) has the responsibility for ensuring the establishment and effective implementation of an integrated risk management framework for the Bank. Further, the Risk Management Department which reports to the Board Risk Committee is empowered to independently identify and assess risks that may arise from the Bank's investing and operating activities; and recommend to the Executive Management Committee any prevention and mitigation measures as it deems fit. In addition, the Internal Audit Department, which is independent of both operations and the Bank's investments units, also assists in the risk management process. In particular, the Internal Audit Department is charged with a periodic review of the effectiveness of the Bank's policies and internal controls, including those relating to the risk management process.

## Pillar 3 Disclosures - 31 December 2017

## 3 Risk Management (continued)

3.4 The Internal Audit Department adopts a risk-based audit approach whereby the nature, timing and extent of the audits are determined with regard to the risk relevant to each business or support unit of the Bank. A risk assessment is carried out annually to determine the major risks faced by each business or support unit and accordingly, an annual audit plan is prepared by the Internal Audit Department and approved by the Board's Audit Committee. The annual plan envisages the coverage, amongst others, of the Risk Management and Compliance Departments.

Detailed operational risk assessments and tests of effectiveness of internal controls designed to mitigate risks (covering each of the risk components as mentioned above) are carried out in accordance with the annual audit plan. A follow up audit to ascertain the status of implementation of observations previously made by internal or external audit is also part of the annual audit plan.

The key findings arising from the work performed by Internal Audit is reported to the Board Audit Committee and senior management of the Bank.

## Credit and Counterparty Credit Risk Management (PD 1.3.22 + 1.3.26)

- 3.5 Credit risk is defined as the potential that a borrower or counterparty will fail to meet its obligations in accordance with agreed terms.
- 3.6 The Bank is not involved in the granting of credit facilities in the normal course of its business activities. Further, the Bank is not engaged in retail business and therefore does not use credit "scoring" models.
- 3.7 The credit risk exposures faced by the Bank are principally in respect of its own short term placements with other financial institutions and in respect of investment related funding made to projects. The investment related funding exposures arise in the ordinary course of its investment banking activities and are generally transacted without contractual due dates, collateral or other credit risk mitigants. All such exposures are however reviewed periodically for recoverability and specific provisions made where necessary having regard to the nature of the exposure and the assessment of collection. Additionally, a collective impairment provision is also recorded to reflect general market risks and negative market conditions. As at 31 December 2017, the total collective impairment provision stood at US\$ 1.36 million.
- 3.8 The Bank uses the Standardized Approach for measuring its credit risk. As it does not use an internal credit "scoring" system, the Bank depends, where available, on ratings from External Credit Assessment Institutions recognized by the CBB for its bank counterparty exposures. As at 31 December 2017 bank balances totalling US\$ 119 thousand were rated as "ECAI 4 (BB+ to B-)" based on ratings issued by Moody's resulting in a risk weight of 100%. In the absence of an external rating e.g. in the case of an investee company, a detailed credit risk assessment of the obligor is performed by the investment team and independently reviewed by the Risk Management Department. The Bank does not have any credit exposure to "highly leveraged institutions".
- 3.9 All lines of counterparty credit limits are subject to annual reaffirmation by the Board of Directors. The limits are also reviewed frequently to ensure consistency with the Bank's investment strategies and to take into account the latest market developments. Given the nature of the Bank's business, the Bank uses nominal balance sheet amounts including accrued interest and other receivables as its measure of exposure. Overall, the Bank's management considers that its policies and procedures constitute a reasonable approach to managing the credit risk in the activities it is engaged in.

## Pillar 3 Disclosures - 31 December 2017

## 3 Risk Management (continued)

## Securitisation

3.10 The Bank does not generally undertake or participate in securitization activities in relation to credit synthesis, acting as a sponsor, liquidity facility provider, credit enhancement facility provider, swap provider nor have any of its assets securitized and therefore has no recourse obligations under such transactions as defined by the Financial Stability Task Force.

However, the Bank has structured and arranged certain "Liquidity Programs" which has raised funds through the issuance of Shari'ah compliant one year liquidity instruments with early redemption options of 30 days, 90 days and 180 days with attractive yields. These are backed by the rental yields of the VC Bank Building, a prime commercial property in the Diplomatic Area of the Kingdom of Bahrain, and of the Jebel Ali Labour Housing Complex in Jebel Ali, United Arab Emirates.

### Off-Balance Sheet Items

- 3.11 The Bank's off-balance sheet items comprise:
  - a. Contingent exposure of US\$ 26.80 million (30 June 2017: US\$ 15.86 million) associated with the issuance of guarantees for investment related funding made by financial institutions to the Bank's investment projects. Since these may expire without being drawn upon, the total contract amounts do not necessarily represent future cash requirements;
  - b. Commitments to finance and invest of US\$ 10.49 million (30 June 2017: US\$ 13.85 million)
  - c. Restricted investment accounts of US\$ 2.71 million (30 June 2017: US\$ 2.74 million) (refer to statement of changes in off-balance equity of investment account holders to the financial statements).

## Concentration Risk

- 3.12 Concentration of risks arises when a number of obligors, counterparties or investees are engaged in similar business activities or activities in the same geographic region or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Accordingly, such concentrations indicate the relative sensitivity of the Bank's performance to developments affecting a particular industry or region.
- 3.13 The Bank has established limits based on geographic regions and industry sectors. The Bank's Large Exposure Policy details the Bank's exposure limits and is in compliance with the concentration limits laid down by the CBB.

Pillar 3 Disclosures - 31 December 2017

## 3 Risk Management (continued)

## Market Risk Management

- 3.15 Market risk is defined as the risk of losses in the Bank's on and off Balance sheet positions arising from movements in market prices. These risks include:
  - a. Those pertaining to profit-rate related instruments and equities in the trading book.
  - b. Foreign exchange and commodities risk throughout the Bank.
- 3.16 The Bank's market risk exposures arise predominantly from its trading portfolio of listed equities and a small portfolio of foreign currency denominated assets that are not pegged to the United States Dollar. The Bank's market risk is currently not a major source of risk since the Bank's business strategy does not envisage taking on significant exposure to listed equities or foreign denominated assets. The Bank measures its market risk exposure using the Standardised Approach.

## Operational Risk Management

- 3.17 Operational risk is defined as the risk of direct and indirect losses resulting from inadequate or failed processes, people and systems or from external events. This definition includes legal risk but excludes strategic and reputational risks. Operational risk differs from other banking risks in that it is not directly taken in return for an expected reward but exists in the natural course of Banking activity, which in turn affects the risk management process.
- 3.18 The Bank is exposed to operational risk due to the complex nature of its alternative investment products and the intricacy of the documentary, legal and other regulatory requirements that surround such investment transactions. Operational risk emanates from all areas of the Bank.
- 3.19 The Bank uses the Basic Indicator Approach for measuring its operational risk. Currently, the Bank conducts its business from a single location. Accordingly, the number of client relationships and volume of transactions at the Bank are lower than at institutions having multi-location or retail operations.
- 3.20 Notwithstanding this, the Bank's operations are conducted according to well-defined processes and procedures. These processes and procedures include a broad system of internal controls, including segregation of duties and other internal checks, which are designed to prevent either inadvertent staff errors or malfeasance prior to the release of a transaction. The Bank also engages in subsequent monitoring of accounting records, daily reconciliation of cash, bank and securities accounts and other checks to enable it to detect, on a timely basis, any erroneous or improper transactions which may have occurred.
- 3.21 The Bank is currently enhancing its operational risk management framework that will
  - a. help track operational loss events and potential exposures as well as report these on a regular basis.
  - b. improve the Bank's loss mitigation process and hence, the overall operational risk management framework.

In addition, the Bank is reviewing and updating its Business Continuity Plan to mitigate the risk of loss from business disruption due to unexpected events.

Pillar 3 Disclosures - 31 December 2017

## 3 Risk Management (continued)

## Legal Risks

- 3.22 Legal risk includes the risk of non-compliance with applicable laws or regulations, the illegality or unenforceability of counterparty obligations under contracts and additional unintended exposure or liability resulting from the failure to structure transactions or contracts properly
- 3.23 The Bank's legal risks are mitigated through legal counsel review of transactions and documentation, as appropriate. Where possible, the Bank uses standard formats for transaction documentation. To prevent potential association with any money laundering activities, the Bank has designed and implemented a comprehensive set of policies and procedures. Adherence to the Bank's policies and procedures is reinforced through staff training as well as internal and external reviews. As on the reporting date, the Bank has no significant material legal contingencies including pending legal actions.

## Shariah compliance

3.24 The Shariah Supervisory Board (SSB) is entrusted with the duty of directing, reviewing and supervising the activities of the Bank in order to ensure that they are in compliance with the rules and principles of Islamic Shariah. The Bank also has a dedicated internal Shariah reviewer who performs an on-going review of the compliance with the fatwas and rulings of the SSB on products and processes and also reviews compliance with the requirements of the Shariah standards prescribed by AAOIFI. The SSB reviews and approves all products and services before launching and offering to the customers and also conducts periodic reviews of the transactions of the Bank. An annual audit report is issued by the SSB confirming the Bank's compliance with Shariah rules and principles.

## Equity Risk in the Banking Book (Investment Risk)

- 3.25 The Bank invests predominantly in three major segments of alternative assets, namely venture capital, private equity and real estate with the main objective to generate consistent superior returns with reasonable risks from high quality, rigorously investigated, efficiently structured and well managed investments. The intent of such investments is a later sale at a profit to strategic investors either through a private placement offering or trade sale.
- 3.26 The Bank uses the Standardised Approach for measuring its investment risks, which is considered a part of its Banking Book. The Bank manages its investment risks at the specific investment level through an in-depth pre-entry due diligence process based on an established set of guidelines, criteria and parameters, as well as active on-going consulting-based monitoring by investment teams. The Bank also seeks to diversify its investments, not only geographically and sectorally, but across various revenue stages of investments as well.
- 3.27 Notwithstanding this, the Risk Management Department independently reviews and provides inputs on areas of risk in potential investments at an early stage of the due diligence process. Working in close co-operation with the respective investment teams, these independent risk reviews support the investment decision making process through both a qualitative assessment and quantitative analysis.

Pillar 3 Disclosures - 31 December 2017

## Risk Management (continued) ന

## Unrealized Fair Value Gains (losses)

recognized in the statement of income are in accordance with the relevant International Financial Reporting Standards. The valuations are performed by the ndependently reviewed by the Risk Management Department and the external auditors, and presented to the Board's Finance and Investment Committee The Bank's investments which are designated at fair value through profit or loss are re-valued at every half calendar year, and the gains / (losses) Bank's investment divisions using appropriate internal valuation models with relevant market inputs and assumptions. These valuations are then for approval. 3.28

- Liquidity risk is defined as the risk that the Bank may have insufficient funds to meet its obligations as and when they fall due i.e. risk of being unable to satisfy claims without impairment of its financial capital due to mismatches in the timing of cash flows. Liquidity Risk Management 3.29
- The Bank has obtained an Islamic financing payables comprising short term bank borrowings of US\$ 30.80 million and a medium term loan of US\$ 70.69 million as at 31 December 2017. The Bank has also extended certain guarantees and commitments in support of its investment projects as disclosed in the notes to the consolidated financial statements. 3.30
- considerations of stress scenarios for the management of liquidity funding risk. The Bank has a portfolio of quoted equity securities in addition to holdings in Although this gives rise to a level of liquidity funding risk, management carefully monitors liquidity through regular forecasts and update of the monthly funding plan prepared by the Bank's Treasury & Cash Management in consultation with the business and finance functions of the Bank, including its yielding Liquidity Programs which are available to meet any unexpected shortfalls in funding requirements. 3.31

Pillar 3 Disclosures - 31 December 2017

## Risk Management (continued)

The Bank's liquidity ratio (cash and cash equivalents plus marketable securities to total liabilities) were as follows as at 31 December 2017: 3.32

Table 10: Liquidity Ratio as at 31 December 2017

000, **GS**0

Pillar 3 Disclosures - 31 December 2017

## 3 Risk Management (continued)

## Profit Margin Rate Risk Management in the Banking Book:

- As a financial intermediary, the Bank may encounter profit margin risks that arise from timing differences in the maturity and repricing of the Bank's assets and liabilities. While such repricing mismatches are fundamental to the business of banking, these can expose a bank's income and underlying economic value to unanticipated fluctuations as profit margins vary. The factors that affect profit margin rates are principally market and economic factors including inflation and growth rates. Profit margin rate risk however, is not a major source of risk for the Bank due to the absence of significant rate sensitive assets and liabilities, as indicated below. Nevertheless, the Bank monitors its exposure to rate sensitive assets and liabilities proactively and in this regard has implemented a Liquidity Management Policy which covers the following:
  - a) The practical steps and procedures for day to day management of liquidity.
  - b) Preparing periodic liquidity projections and forecasts and the review thereof.
  - c) Liquidity stress testing.
  - d) The reporting of liquidity status and projections, including stressed projections.
  - e) The liquidity contingency plan for identifying and dealing with unforeseen disruptive liquidity events professionally and effectively.

## 3.34 Table 11: Profit Margin Sensitivity Analysis in the Bank's Banking Book

|  |                             |                                  | USD'000                |                                  |                         |

- 3.35 The impact on net income for a benchmark change of 200 basis points in profit rates is as follows:
  - a. Net profit margin income for the reprising period of 1 day to 3 months would potentially decrease by US\$ 604 thousand if the profit margin rate increases by 200 basis points.
  - b. Net profit margin income for the reprising periods of 6 months to 12 months would potentially increase by US\$ 73 thousand if the profit margin rate increases by 200 basis points.
  - c. Net profit margin income for the reprising periods of 1 year to 5 years would potentially decrease by US\$ 719 thousand if the profit margin rate increases by 200 basis points.

Pillar 3 Disclosures - 31 December 2017

## 3 Risk Management (continued)

## Equity of Investment Account Holders and Displaced Commercial Risk (DCR)

- 3.36 The Bank's exposure to Displaced Commercial Risk is limited to its Equity of Investment Account Holders which comprises the following:
  - > The GCC Pre IPO Fund, which was set up in 2006 to invest in the shares of unlisted GCC companies in the pre-IPO stage. The total size of the fund is currently approximately US\$ 2.7 million. The Bank manages the fund as a Mudarib, in exchange for a fee of 20% of returns over a 10% simple return. The investments in the GCC Pre IPO Fund are exposed to the general equity market risks prevalent in the GCC countries and in the real estate sectors.
  - > Historical returns on Equity of Investment Account Holders is shown below:

Table 12: Five Years Historical Return Data on Equity of Investment Account Holders

3.37 The Bank is aware of the importance of its fiduciary responsibilities in the management of the Equity of Investment account holders. Transactions with Investment Account Holders are entered into only on the basis of signed subscription and underlying investment agreements, and internal procedures are in place for the proper management and handling of these responsibilities. (Refer to statement of changes in off-balance equity of investment account holders to the financial statements).

## 4 Impairment Provisions:

4.1 The Bank follows a prudent policy of regularly reviewing all assets for impairment. Impairment is recognized and charged to the statement of income when circumstances indicate that the recoverability of the asset is in doubt or the investment is not expected to perform as expected.

General allowance represents collective impairment against exposures which, although not specifically identified, are considered to have a greater risk of loss than when originally incepted.

Impaired Islamic financing facilities includes those where full repayment (collectability) of the principal or/and the profit is in doubt, highly questionable or considered uncollectible due to inadequate protection by the impaired paying capacity of the customer (or counterparty) or by impairment of the collateral pledged if any.

4.2 The impairment provisions recorded is summarized in the tables below:

Pillar 3 Disclosures - 31 December 2017

## 5 Corporate Governance and Transparency

Disclosures on corporate governance and transparency, including qualifications and experience of directors have been disclosed in the Annual Report for year ended 30 June 2017. The following tables give details of distribution of shares by nationality, ownership of shares by directors etc.

## 5.1 Table 15: Distribution of shareholders by nationality:

| Country                 | Ownership % |
|-------------------------|-------------|
| United Arab Emirates    | 3.29%       |
| Kuwait                  | 23.66%      |
| Kingdom of Saudi Arabia | 57.71%      |
| Qatar                   | 4.78%       |
| Oman                    | 2.57%       |
| Kingdom of Bahrain      | 7.99%       |
| Total                   | 100.0%      |

## 5.2 Table 16: Distribution of shareholders by size of shareholding:

| Ownership %  | Number of shareholders |  |  |
|--------------|------------------------|--|--|
| Less than 1% | 149                    |  |  |
| 1% - 2%      | 15                     |  |  |
| 2% - 3%      | 6                      |  |  |
| 3% - 4%      | 2                      |  |  |
| 4% - 5%      | 0                      |  |  |
| More than 5% | 2                      |  |  |
| Total        | 174                    |  |  |

Two of the Bank's shareholders hold more than 5% ownership in the Bank. These are corporate shareholders noted below:

- The Commercial Real Estate Co. (K.S.C.C.) 7.23% ownership; and
- Securities Group (K.S.C.C.) 6.02% ownership.

## 5.3 Ownership of shares by government:

The Bahrain Development Bank B.S.C. (c), a public sector organization owned by the Government of Bahrain has a 1.19% interest in the share capital of the Bank.

## 5.4 Ownership of shares by Board members:

Seven members of the Board have shareholdings ranging from 0.05% to 2.51% of total capital. In addition a number of Board members represent corporate shareholders with shares ranging from 0.48% to 7.23%.

The Board is responsible for the stewardship of the Bank's business and affairs on behalf of the shareholders, with a view to enhancing long-term shareholder value whilst taking into account the interests of other stakeholders, and maintaining high standards of transparency and accountability. The Board comprises 12 members, the majority of whom are independent non-executive Directors.
